Selective entry process
Portfolio requirements

Health Sciences and Science, Mathematics & Technology Campuses

Students who are successful in the QA Entrance Test will be invited to attend an interview to present themselves and their capabilities. Interview candidates are asked to bring a portfolio of past work to their interview. The candidate will use the portfolio to explain their work and the reasons they should be considered for a place at the Academy for which they are applying. A portfolio of awards and certificates is not required.

Students applying for the Health Sciences and Science, Mathematics & Technology Campuses are asked to prepare a portfolio that includes:

1. A statement (maximum one A4 page font size Arial 10) outlining the candidate’s academic journey including the highs and lows.
2. Samples of work the candidate believes demonstrates academic excellence and innovation (laptop or hard copy). This could include scientific research and school assignments. Candidates should focus on an area of interest.

Students applying Creative Industries Campus should refer to the specific Campus portfolio requirements document.

IB Music is offered at Creative Industries and Health Sciences Academies and students wishing to study Music need to have a solid base in music theory, as theory and composition form a significant component of the IB Music course. It is recommended that a student has achieved a level in music theory equivalent to AMEB Grade 3 Theory by the time they commence at their chosen Academy. Students not wishing to study Music as part of their IB Diploma may choose to participate in a variety of choral groups, ensembles and bands that contribute to the rich diversity of their Academy cultural experience.
